

## Delivering IT and Network Security with Innovation

*SecureData, Supplies, Installs, Supports and Manages Secure Network Solutions. Our background has been in providing Secure IT and Network Security since 1992 and we specialise in providing Managed Services for Security and Networking technologies. Our approach is a consultative one and our portfolio is independent.*

*Flexibility and partnerships are core to your ever changing needs – choosing a dynamic partner delivers more.*

# Why SecureData?

## Making the right choice

**SecureData is the market leading independent provider of IT networking and security solutions.**

Since 1992, SecureData's wealth of skills and experience in IT networking and security solutions have been leveraged by all vertical markets from small businesses through to global corporate enterprises to enable, protect and secure their network and data, to minimise business risk.

### **Addressing your challenges**

SecureData provide organisations with an independent vendor agnostic view on networking and security strategies that are tailored to your specific requirements.

### **Delivering strategies with confidence**

SecureData ensures that their highly skilled and experienced staff maintains the highest possible levels of vendor and engineering certifications. This enables SecureData to be best positioned to deliver advice and recommendations in order to validate and enhance your networking and security strategies.

### **Providing proactive managed services**

SecureData has an extensive portfolio of managed devices, ranging from core network infrastructure to bespoke devices. Having developed its own Network and Security support and management infrastructure, SecureData does not outsource any of its managed services.

## What we do

- Product Supply
- Consultancy Services
- Implementation and Integration Services
- Managed Services
- Project Mangement
- Telephone Support

## A refreshing approach

**How SecureData adapts to meet your needs**

### **Your support**

SecureData offers options for support services, ranging from reactive telephone and email support to a fully managed 'lights out' service. All support services are available to cover both standard and extended business hours via our fully manned, 24x7x365 Security Operations Centre. Our multi-tiered escalation process ensures that all issues are dealt with efficiently by the correct engineers.

### **Your contract**

SecureData can offer bespoke terms including but not restricted to; non-standard SLA's, payment terms, financing options and contract duration, providing a flexible yet unique contract to it's customers.

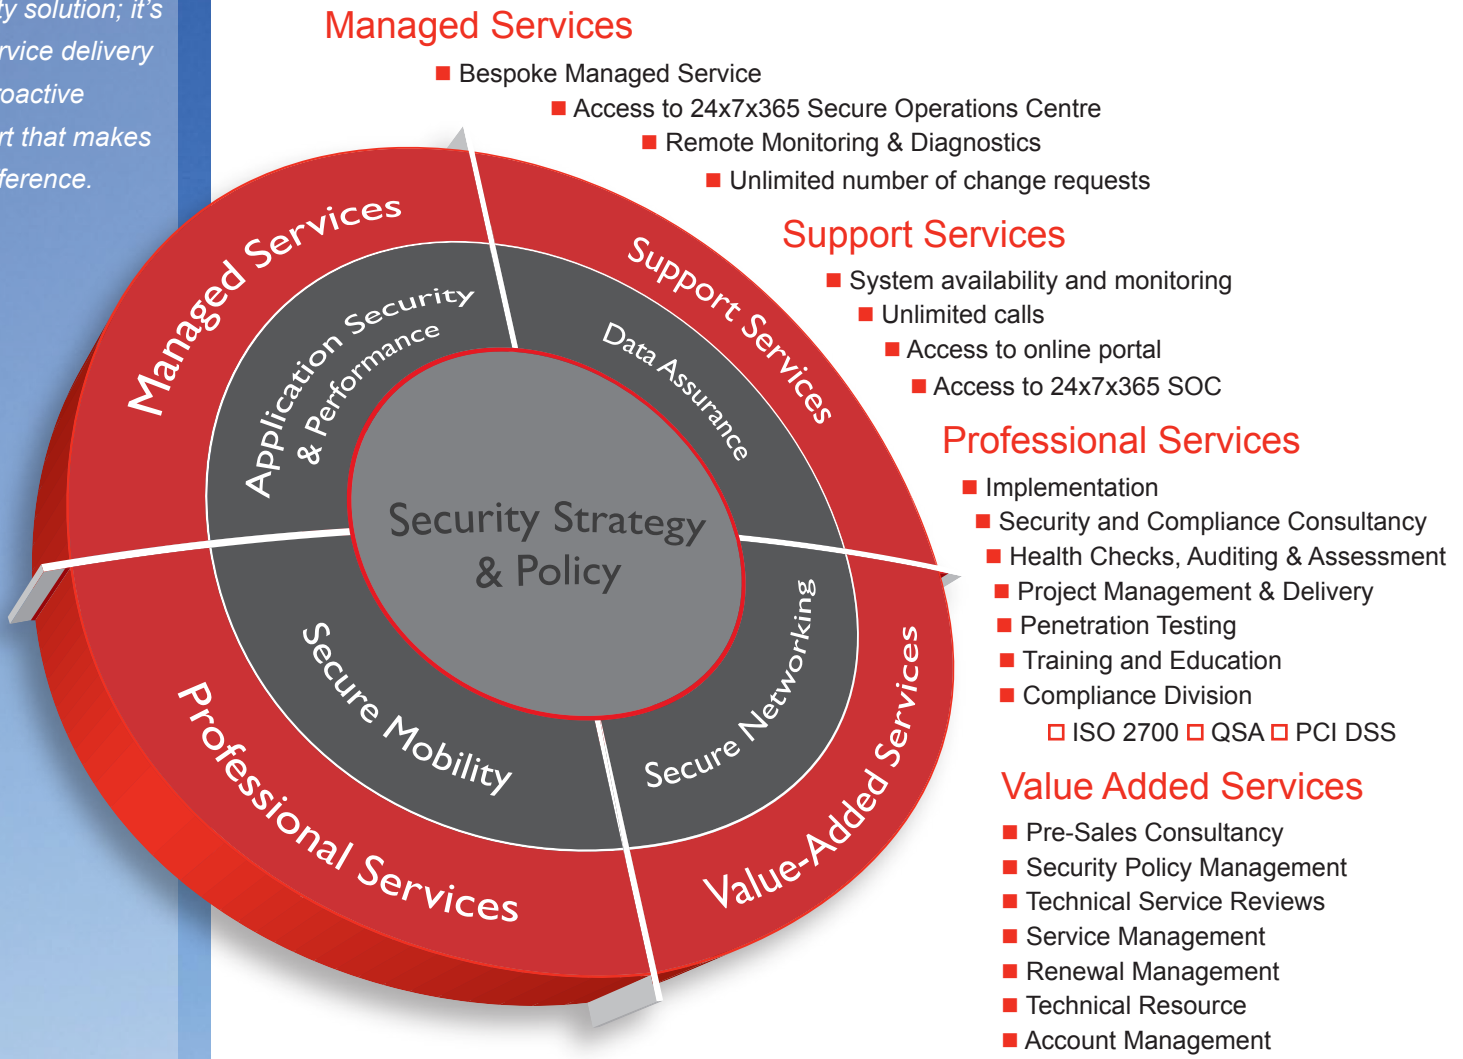

### **Your investment**

SecureData understands that organisations are increasingly being driven to deliver more for less with restricted IT budgets. Our market knowledge and experience enables us to deliver solutions that meet short term requirements whilst aligning to long term strategies.

**SecureData value and care about their customers and provide Account Representation, Technical Account Managers and Pre-sales Technicians. SecureData are a specialist extention to your IT team.**

Anyone can offer an IT networking and security solution; it's the service delivery and proactive support that makes the difference.
